Now you can become a guru before buying a Jacuzzi. In our article, we will reveal the characteristics that make it favorite among many. We discuss only the main features of this model, but we also examine its advantages and disadvantages based on the user's experience. You will also find information on how it works, as clean and maintain heat. You will also find solutions to the most common problems. Coleman Salpas Why did you choose to review the Coleman Salpa (Lay-Z-Spa)? Coleman Lay-Z-Spa that then rebranded to SaluSpaA € Á € is a hot tub model designed in collaboration with Coleman and Bestway brands. Á This spa is easy to configure as jacuzzi Intex PureSpa models, but it is faster to inflate and has no air leakage. You will also be satisfied with a quality value for money. Having almost the same quality as the Intex, Coleman sells hot tubs that are cheaper.Á You can check the price current SaluSpa here. This pool also has a water capacity of the largest model 4 person Intex PureSpa. While that Intex can hold 210 liters of water, the maximum capacity of a Coleman is 242 liters. The SaluSpa is more spacious and ideal for up to 6 people.Á These features make the Coleman SaluSpa jacuzzi stand out among the other models, which is why we chose to review it.Á Who is the Coleman SaluSpa best suited for? First of all, it's the best option for those who want to use it for a group of up to 6 people or for those wishing to relax in it with his family. This spa is perfect for both evenings quiet family friend and loud parties. You will not have to worry about fitting in all, as this model will be able to accommodate all heights and weights comfortably. Your guests will feel comfortable in the bathtub without feeling cramped.Á Second, the Coleman SaluSpa is best for those who like to take care of their safety. Both the pump and the hot tub are pre-tested. In addition, it has a fault circuit interrupter (GFCI) which trips to 6mA. The differential circuit breaker is designed to interrupt the power supply in case of earth fault, and it does so within a minimum of 1/40 Á ° a second.Á Thirdly, this whirlpool Á ` perfect for creating a relaxing place in your backyard. The SaluSpa combines the air from the bubbles and the heat from the thermal center. As a result, you get a relaxing massage system.Á Now let's take a look at the pros and cons of this whirlpool. Pros and cons of Coleman SaluSpa (Lay-Z-Spa): Pro Customer Experience: The first advantage is the ease of installation. This is a well thought out policy as the inflatable hot tubs are designed with the ability to transfer them. You will need about 30 minutes to get it all together, and then another 10 minutes to inflate the hot tub. The time to fill with water can vary by several customers use tubes with different pressure. For example, with a flow rate of 1 liter per minute, you have 4 hours to fill the bath tub with water.Á Easy to set up a client from NY best purchase I've made a Karen from WV The next advantage is the size of the Jacuzzi. It is designed for 4-6 people, and 6 adults will fit comfortably. Pay attention to the amount of water you use. The laws of physics work great here: the more people that come in, the higher is the water level. Be careful not to spill the water.Á Must-Have You Andrew C. from FL Another important advantage is the automatic shutdown of the heater and the pump. This function is for security reasons. The heater and the pump automatically switches off after 72 hours. This avoids the risk of overheating of the hot tub. Some people are not too fond of the function, but it is a solution to restore the earth fault circuit breaker or a circuit breaker at least every two days.This feature also helps to cut electric power costs. Without the automatic shutdown feature, you can have a bill of up to \$ 100 per month. But when you turn on the automatic shutdown function will cut your bill to about \$ 80 a month. To compare, in our article on Intex PureSpa, we discovered Maintenance of the Bubble Purespa also massages set can cost up to \$ 120 per month. Note that the price of energy can vary from Region.á, a last but not least is the heating speed. After installation, it is necessary about 24 hours to reach a temperature of 104 degrees F (the average hot tub needs up to 48 hours). Then the Saluspa heats the water about 2-3 degrees f per hour. Note that if the water is less than 40 degrees f, the pump will not be On. This to prevent the ice to enter it. We love this inflatable hot tub Á € á, ~ "Tina by Co counter: The paper instructions are not clear. Some buyers mention difficulty following the instructions in the user's manual. However, you can find user-friendly video tutorials on Coleman website, as well as on YouTube. Large product Á € á, ~ "Woman from NY may be pump errors sometimes. The different codes indicate the cause of the problem. Each code has a corresponding solution that you can find here. Construction The Coleman Salpa has a construction of rays. This design offers a superior structural stability and maintains a comfortable surface. The main points of the construction of the hot tub are listed below. Material The hot tub is made of the patented Bestway TriTech material. It is a synthetic fortified material, resistant to UV rays, 3x. This translates into the duration of the spa walls. The structure of this material also helps maintain its shape. That's why it doesn't matter how many times swells or deflamin the hot tub: you will always keep your shape. Digital control panel you can easily set the hot tub with an integrated digital control panel. First, you need to press a button to unlock the system and then you can check everything. There are separate buttons to activate the heating system and turn on / off the filter pump. Adjust the temperature and set the heating duration to get the hot tub ready for your suitable time. You can alternate between Celsius and Fahrenheit. You can also activate the massage system and relax while your whirlpool is on. An energy-saving timer also helps reduce costs. Jets The Coleman Salpa uses AirJet technology. Skip air in the water from the spa background. It is so that the relaxing massage effect is created. While the air comes from below and has a power of 114 bubble jets, this will provide you with the best rear and feet massage. The system can be activated with the simple touch of a button. The heating system The Coleman Salpa system heating system is intuitive and efficient. Thanks to the control panel, you can set the startup and finishing time of the Jacuzzi heating, as well as set the temperature. You could also switch to the quick heating function. The heating system needs about an hour to heat 242 liters of water of 2-3 Á ° F. That's why you will need about 24 hours to heat the hot tub for the first time after the assembly. Time can vary depending on the water temperature you use to fill the tank. In any case, it's a quick process, since the average bathtub needs 48 hours. To keep the water temperature, do not hesitate to use the included cover. Below is a table of how long it is necessary to heat the tub at 104a Á ° F depending on the environment and start the water temperature. Remember: Do not use water that is colder than 40 Á ° F. Ambient TemperatureTeater Temperature Temperature Temperature Duration 50 Á ° F50 Á ° F104 Á ° F32 H 59 Á ° F59 Á ° F104 Á ° F26 H 68 Á ° F68 Á ° F26 at 68 Á ° F68 Á ° F104 Á ° F20 H 77 Á ° F70 Á ° F104 Á ° F15 Á ° F70 Á ° F104 Á ° F14 H 86 Á ° F86 Á ° F104 Á ° F9 H The cleaning system La Cleaning The system that is represented by the filters is also an important part of the hot tub. Prevents the development of bacteria and mushrooms in the water. This spa has a Chemconnect distributor. It is a chemical distributor that disperses a stable level of chlorine throughout the spa. This helps keep the water clean and safe for use. Having the right pH, the level of the bromino and the alkalinity is important to keep the water usable. No chemical is included in Coleman Salpas but Easily buy them online. You will need to: We recommend buying these things separately rather than taking a pre-packaged start kit because sometimes they do not have all the necessary chemicals (for example no disinfectant) and rather contain unnecessary elements such as a metal removal device. But if you'd still have everything in a single package, we found the best starter kits for chlorine and bromine sanitizing systems. Also, don't do it to change the filters. They are washable, but to keep the water clean and ensure that they are functioning properly, replace the filters every 2 weeks.Á Á Á Á Á SaluSpa Coleman. We have listed features the characteristics of this whirlpool in the table below.Á ModelColeman SaluSpa ManufacturerBestway and Coleman Dimensions77 product x 77 x 28 inches x 28 inches Capacity4-6 inflated size77 persons water capacity242 gal (80%) actual water flow320 gal./h Article weight88 pound filled weight2,103 lbs Max temperature104Á Á ° F Heating 104Á Á ° F ~ 24 hours increase rateApproximately 2-3rd heat Á ° F / h air bubble jets114 Massaging turbo blower6.5A heat element11.3A to 68A- Á ° F Pump0.7A pump of the circulation filter Power rate12A to pressure1.2 68A Á Á ° F working PSI (0.08 bar) energy saving timerYes MaterialTritechÁ € Á € ConstructionBeam Chemical dispenserChemConnectÁ € Á € electrical outlet110 v IncludesCover, pump, ChemConnect handouts r chemical, filter cartridges 2 Coleman SaluSpa pump problems and their solutions As mentioned bef ore, you may have some problems related to the pump. There are 6 main codes, with their corresponding causes, reasons and solutions to make problems more easily address. We've listed below: working a mistake codeCausesReasonsSolutions E01The water flow sensors without pressing the filter or heat sensor buttonThe flags of water flow does not fall back into their correct positionUnplug pump, hit the side of the pump tightly, and reconnect E02The sensors water flow does not detect the flow1 water. You have forgotten to remove the caps from the cap 3 into the pool 2. The filter cartridges are dirty1. Remove the plugs 3 cap before heating. 2. Remove the filter set from inside the pool and pushing the filter button or heat. If no warning appears, clean or replace the cartridge filter and install the filter set in the E03The pool water temperature is below 40 Á ° FThe spa is not designed to work with water temperatures below 40 degrees F . Disconnect the pump and restart the pump only when the water temperature reaches the temperature of the water 43A Á ° F E04The is above 119A Á ° FÁ spa is not designed to work with water temperatures in excess of 104A Á ° F. Disconnect the pump and restart the pump only when the water temperature reaches 100A to ° F or lower E05Issues with pumpa s connections1 thermometer. Pump thermometer connectors do not work properly. 2. Pump thermometer is brokenContact your point Bestway to the local service in order to obtain instructions E06The thermal protection cut offthe ambient temperature is higher than 122A Á ° F or the pump is directly under the sunshineUnplug the pump, and put the pump in a dry, cool place. Only restart the pump when the water temperature reaches 93.2A Á ° F or lower Spa accessories for the best experience We hope you like the Coleman SaluSpa. But some accessories will enhance the experience of soaking. Spa Pillow and Spa Steps It is a waterproof pillow that will help you relax in your hot tub. It has an orthopedic design that provides support for the head, shoulder, neck, and thermal steps back.Use to easily get in and out of your hot tub. This model is made of plastic and is lightweight. You can clean it with soap and water only. Be sure to use a really clean water in your hot tub to prolong life filtersÁ € . It also helps to wash your feet before entering the hot tub. Holder Snacks and drinks you are bound to feel peckish in the water. With a practical drink holder and snack tray, all your favorite snacks and beverages will be hand.Á Bluetooth Portable Speakers Listen to Preferred music even in water. This Bluetooth waterproof speaker has a 45-foot wireless connection radius. You can listen to your favorite music while you take for a maximum of 8 hours from a Charge battery. The Coleman Salusps or Coleman Lay-Z-Spa (as it was called previously) is an inflatable whirlpool tub designed for 4-6 Adults. You will be satisfied with a quality relationship. This hot tub heats water fairly quickly and e At its resistant and well thought out, it works well in keeping the desired temperature. The functions like a user-friendly control panel make it easier to set your pool according to your needs. You will need about 40 minutes to assemble and swell the unit and about 24 hours to heat the water. FAQ FAQ.
