## How to block someone from leaving a voicemail android

Can you block someone from leaving a voicemail android. How do i block someone from leaving a voicemail on android.

I continue to receive spam calls from a number every night at midnight. I stuck it, but now it goes only to voicemail and I have to delete voice messages every morning. It is annoying. Is there the possibility to lock it to leave voice messages, or simply automatically answer then hang up? I didn't find one to Android himself (my phone has ICS). I also tried Mr. Number, which I thought would do it, but he doesn't. He works, see update below. I also spoke with my courier, but apparently I would have to add "smart number block" or something of my plan for about \$ 5 a month. If possible, I would just prefer to get an app response and rather than having another tax to pay. Delayed update: I followed the Eldarerathis directions provided below for Mr. Number and does what I was trying to do; I have just done something wrong before. The phone will ring again for a few seconds, so it could be better to silent it if the call arrives in a coherent and cluttered time as it is for me. viewfull = 1 # post5106431 I know how to block callers on my note 5 using the phone app. But, they can still leave a voice message. How can I stop it? Is there an environment I miss? Or is there an app that I wasn't able to find? ... thanks for any help. 04-05-2016 01:14 like 0 04-05-2016 01:15 pm as 1 https://forums.androidcentral.com/showthread.php?t=664133&s=07b55268acbf1cfa2b3e700376cad&p=5108719&viewfull=1#post5108719 I found a call call blocker without spam voicemail that claims to do so. I didn't have a call from the #, so I don't know how it works. It is free for 5 #, but it's just \$ 1 to update and get rid of the 1 announcement I've seen. Has anyone familiar with this app? 04-06-2016 02:40 PM as 1 we want to know how it works for you via Android Central app 04-06-2016 07:38 likes 0 I did a little control over many of the call blockers in the game store . Most of them work as far as you prevent the sound of the phone, but as far as they prevent them from going to the answering machine ... well, none of them did it, even if some have said they could, I got tired of blocked calls that go to voicemail once and asked my carrier (T-Mobile) to disable VM on my line and did it. It was added automatically when I changed my phone number and never had disabled again. I'm not sure there would also be a way to do it with a rooted phone. I'm giving up trying. Laura Knottek and H3Aterzz like this. 04-07-2016 01:12 am Like 2 Try an app no more voicemail Published via the Android Central App 04-09-2016 06:00 like 0 Fois Google Voice. They have this feature: treating like "spam": the caller will listen to rings and therefore is asked to leave you a voice message. None of your phones ring. The answering machine will be automatically marked in your inbox as a spam and you will not receive a notification for the answering machine. I'm not sure if Google Voice Blocket works functions for voicemail. I have the real calder ID app and use that to check and block calls. It's easier for me. Most are telemarketing so that they do not leave vocal mail, but some do not give up. Published via \* Note 5 \* 04-10-2016 08:23 A Are like 0 0 I had T-Mobile disable my answering machine. Those who know me I just text so anyone who calls, I just called. I try to Google for numbers I do not recognize, and if you are a spammer, clutter. 05/19/2016 01:53 0 How The application let Mr. Number is deciding whether to send blocked calls vm or have them pick up and hang up. All the while not disturbing you. Posted via Platinum Gold Note 5 05/20/2016 12:08 0 How Try this application called the call control 07 - 21-2016 04:03 as 0 I know how to block callers on my Note 5 using the mobile application. But, they can still leave a voice message. How can I stop it? Is there an environment I miss? Or is there an app that I wasn't able to find? ... thanks for any help. Do you look in the app store ?? Call blocker secretarial works like a charm. Hang spammers and everything else. Posted via the Android App Central 21/07/2016 06:04 0 As I found an app called Call Blocker No Voicemail spam that claims to do this. I didn't have a call from the #, so I don't know how it works. It is free for 5 #, but it's just \$ 1 to update and get rid of the 1 announcement I've seen. Has anyone familiar with this app? Fantastic already alone beat it !! App works great Posted via the Android App Central 21/07/2016 06:05 0 How test application called Mr. publication number through Android App central 07/22/2016 09:22 as 0 can you please share how to do this - select the option in Mr. Number to which locks automatically caller? I can not find it. Thanks. 12/16/2016 10:46 0 How During my last phone I used rooted Root Call Blocker and would answer and hang up the call, in silence. They have not had the problem lately, but it's nice to know there are options unavailable root. 17/12/2016 08:02 0 As easy to avoid answering machine when using any 3rd party application or even built called in rejecting or blocking call on your Android device. Just go to your devices call forwarding settings and find the line just call ahead and change the number there to + 1-718-984-9970, that's always a line busy playing the busy signal. Once you have it installed and then saved going to built in the block calling reject the telephone directory and add all the numbers discomfort or selected by the register number or called one by one to be locked then save them. Now, when a blocked caller called then they will be automatically forwarded to quietly busy and can not leave voice messages from that number blocked anymore. Two things to remember with this configuration a single Revenue or outgoing call can be in the process with one warning call It can happen, because when it happens, then any caller blocked or will not be forwarded to the number constantly busy and it is not possible to compose your answering number to verify you will be brought to the busy line as well. USA V.M. App or press key 1 on the dialer phone to access the answering machine to check or change the settings. I hope that this way helps to avoid voice messages from unwanted calls. Don't forget about unknown caller configuration - - Caller ID display in the call refusal block settings. Sam Presley 2017/01/16 03:51 Like 0 I use Call Blocker Gold. 16/01/2017 08:55 0 As I looked at the description for Mr. Number and Hiya blocking call and it seems that The Hangup function is not supported by Android 5.0 or later. That's incredibly stupid, so there is currently no good way to stop the VM. 2017/07/08 07:05 Like 0 I returned to use extreme call blocker, it seems I bought it before. It has an answer and hang up the option. I also have a lot of calls from the same exchange every day, 856-353-xxxx. I replaced the x of the asterisks in the black list and these are automatically answered and hung up, beautiful. It has a lot of other features that are useful. 07-08-2017 08:37 it likes 0 only so all those who discover this know Mr. number e Hiya Don 't have the ability or options available on all phones to send blocked calls to voicemail. If you read everything that says on the app in the App Store tells you this. I wish it would have the chance to collect and hang up the blocked calls for all mobile phones and the software running on such phones but they don't suck. 07-24-2017 04:10 like 0 0
