My brother in law got a keyboard that he uses while they play together. I could tell my husband wanted one so I got this one! It's so cool! Lightweight, just the right size and the colors are awesome. The different programmable options for the lights are great. I may start playing now! Lastly would be that it has a easily cleanable texture.LikesColorDesignSetupAppearanceKeysHelpful?Wrist pad it comes with is amazing, the mechanics on this one are very great for gaming, highly recommend for it's priceHelpful?June 21, 2021[This review was collected as part of a promotion.] When I brought this into my house, my kid immediately was excited. He likes to game and chat with his friends online and he was excited to get a new keyboard to do so. My impression of it is that it's pretty durable which is greatWritten by a Razer CS customer.Helpful?July 7, 2021This is a great keyboard. I've fallen in love with it when I first started playing with the LEDs and such. It's very comfortable and honestly, one of the best keyboard I've purchased.Helpful?November 19, 2020I got this and automatically was satisfied with the clicking of the keys before I opened the box. It was easy to assemble with the wrist pad being magnetic. The rgb on the keyboard took me a little to figure out but once I read the manual and played with it I got it. It's my first piece to a gaming setup and I'd say it was the best place to start. It's faster response and sounds make a standard look and feel cheap. I'm never going back to a standard keyboard again. Very easy to use, especially with my laptop and also my desktop as well. Light weight. Enjoyed that it lights up so when it do get a little dark i am still able to see the letters on the keyboard. I can carry it from one location to another without any issues. Easy to wipe of once dirty. Happy i got the color black so the color don't fade. Excellent for gamers or just for everyday use. [This review was collected as part of a promotion.]Written by a Razer CS customer.Helpful?November 22, 2020I got this keyboard a couple weeks ago and I really like it. It is super easy to install and I love that it has a no tangle cord. The removable wrist support is really nice to. It connects with a magnet so it won't go anywhere. The best feature is the keys. They are very sensitive to any touch and I just love the sound of them clicking. The only negative thing for me to say is that I wish it would sit up higher off the table. Even with the legs of the keyboard it doesn't sit up that high. Overall its a great keyboard and I would definitely recommend it.
