"A veritable tour de force in archival and oral history."

"Provides fresh material to help us rethink the character of the Revolution." —DR. PAULO DRINOT, editor, *Che's Travels: The Making of a Revolutionary in 1950s Latin America*

"An unprejudiced and wide ranging study." —DRA ANGELINA ROJAS BLAQUIER, Institute of Cuban History, Havana

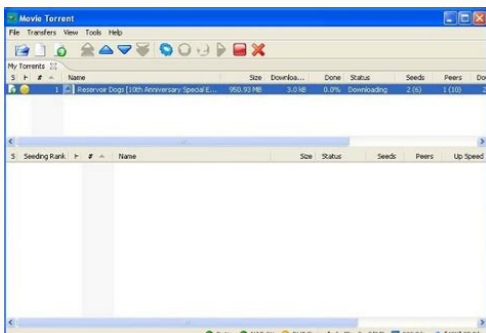

Millions of words have been written about the Cuban Revolution, which is almost universally understood as being won by a small band of guerrillas. Steve Cushion turns the conventional wisdom on its head, contending that significant portions of the Cuban working class launched an underground movement in tandem with the guerrillas operating in the mountains.

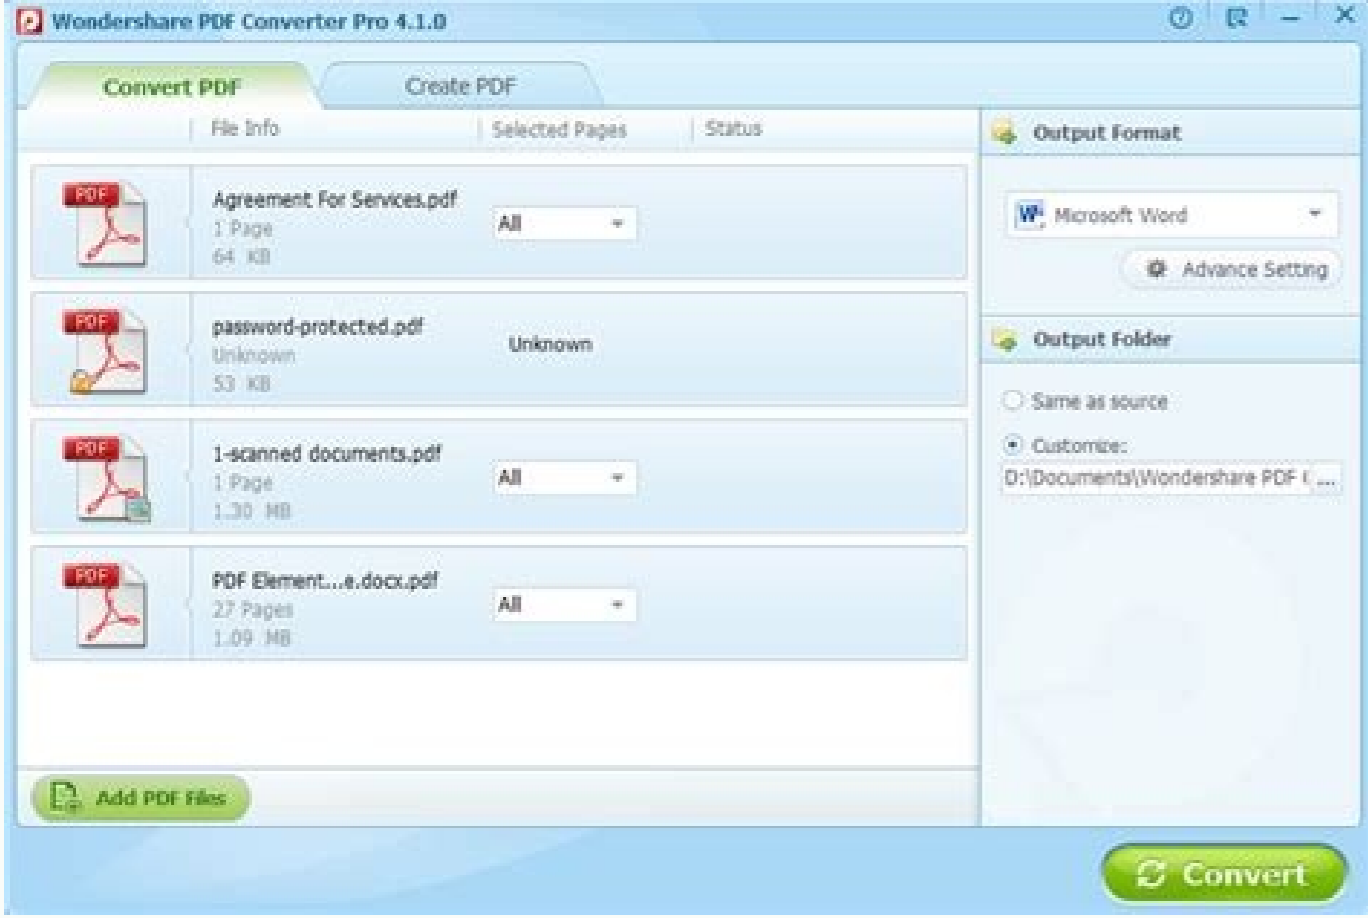

Developed during five research trips to Cuba under the auspices of the Institute of Cuban History in Havana, Cushion uncovers widespread militant activity, from illegal strikes, to sabotage, to armed conflict with the state, all of which culminated in two revolutionary workers' congresses and the largest general strike in Cuban history. Arguing that these efforts helped clinch the victory of the Revolution, Cushion presents a fresh and provocative take on the place of the working class in Cuban history.

"Our understanding of the making of the Cuban Revolution will be permanently shaped by this inspiring and compelling history." —Dr Leo Zeilig, University of London

Offering these types of files (often pirates) to a mass audience was not an option before, simply because the costs of bandwidth and storage were very high. Instead of simply sharing a file with a person at a time, BitTorrent created swarms of sharers, which would see download speeds increase when more people joined. This traffic was a heavy burden on the infrastructures of Internet providers and several large ISPs contracted it through an actively accelerated torrent traffic.
