How do i auto rotate pictures on android. How do i get my pictures on my phone to rotate. How to stop pictures from rotating on android. How do i rotate a photo on my android phone.

Leave that bulky photo album at home and use your phone instead to relive all those precious memories. With the Gallery app, you can view, edit, and manage your pictures, videos, and albums right on your Galaxy phone. Note: Available screens and settings may vary by wireless service provider, software version, and phone model. If you spent an hour trying to take that perfect selfie, you can look back at your hard work by viewing it in Gallery. Navigate to and open Gallery, and then tap the Pictures tab. To search for a specific picture, tap the Search icon in the upper right corner. You can search for a picture by its tag, album name, or other details. On newer phones, there is an option to group similar-looking pictures together. When this happens, not all of your images will appear in the Picture tab; instead, you'll see a small number (i.e., 2, 3, or so on) in the corner of some image thumbnails. Tap the thumbnail to view the images that have been grouped together. If you do not wish to use this feature and would like all your pictures to display, simply tap the Group similar images icon at the top of the screen (it looks like a square). Once you've found your desired photo or video, tap the thumbnail to view it. Tap More options (the three vertical dots) to be given additional options. You can view the file's details, print a photo, set an image as your background, and more! If you'd like to edit a photo, navigate to and select your desired picture. Tap Edit (the pencil icon), and then use the available tools to adjust the picture: To rotate the picture horizontally or vertically, tap the Rotate icon (the circular arrow). To flip the image horizontally (mirror it), tap the Flip icon (the line and two arrows). To change the picture's aspect ratio, tap the Aspect ratio icon (it should say "Free"), and then choose your desired option. You can also rotate the photo up to 45 degrees by moving the slider in either direction. To adjust the picture's perspective, tap the Perspective icon (it looks like a window). Choose either Horizontal or Vertical, and then use the slider to change the perspective. To select a certain portion of the picture, tap the Lasso icon (it looks like a dotted circle). Use the different tools to draw and select your desired portion of the picture. To add filters to the picture, tap the Filter icon (it looks like three circles). Choose your preferred filter from the default options. Or, tap My filters to create a new filter or apply one you've created in the past. To adjust the brightness and other lighting settings, tap the Brightness icon (it looks like a sun). From here, you can adjust the light balance, contrast, saturation, and more. To draw, add stickers, or write text on the picture, tap the Smiley face icon. Use the provided options to decorate the picture. While drawing, you can undo or redo edits by tapping the Undo or Redo icons. To access even more editing options, tap More options (the three vertical dots) in the lower right-hand corner. Here you can use the Object eraser, Color mix, and other helpful options. If you are unsatisfied with the edits you made, tap Revert to undo all of them. To save your edits over the existing picture, tap Save in the upper right-hand corner. If you'd like to save a new picture with the edits and keep the original picture, tap More options (the three vertical dots), and then tap Save as copy. Note: If you tap Back while editing a photo, a popup will appear and ask if you'd like to save or discard your changes. Have a personal hobby that you're always documenting? Put all those photos in an album in the Gallery app, so you can look at them again later without shuffling through all your other pictures. From the Pictures tab, touch and hold an image to select it. Alternatively, you can tap More options (the three vertical dots), tap Edit. Next, select your desired picture(s). Next, tap More at the bottom of the screen. Then, tap Copy to album to copy the image(s) to a different album. Or, tap Move to album to cut and paste the image(s) into a different album. Then, select the album you want to move or paste the photo into. The image(s) will now be saved to that album! To create a new album, tap the Albums tab at the bottom, and then tap More options (the three vertical dots). Tap Create album. Enter the name of the album, and then tap Create. You can move images to the new album using the steps mentioned earlier. Your friend photobombed an otherwise great picture. Delete their prank in just a few steps. From Gallery, tap Albums, and then tap your desired album. Touch and hold the thumbnail of the photo(s) you want to delete. Tap Delete, and then tap Move to Trash to confirm. If you want to permanently delete images from the Trash, open Gallery, and then tap Menu (the three horizontal lines) at the bottom. Tap Trash, and then tap More options (the three vertical dots). Tap Empty, and then tap Delete. With so many photos, your Gallery can get a little disorganized. Just create an album to get rid of the clutter and group photos together so they're easier to find later. From Gallery, tap the Albums tab, tap More options (the three vertical dots), and then tap Create album. Enter the desired name for your new album, and then tap Create. To add pictures to your new album, tap the album. Tap Add items, and then tap the Pictures tab. Select the pictures you want to add, and then tap Done. Then, choose how you'd like to move the images by selecting Copy or Move. You can also combine your albums together by creating groups. From the Album tab, tap More options (the three vertical dots), and then tap Create group. Enter the desired name for your new group, and then tap Create. To add albums to your new group, tap the group, and then tap Add albums. Next, select your desired albums. Tap Add when you're finished. Show off that amazing day you had in the city by sharing a story. With this feature, the Gallery app lets you create a little slideshow of your pictures and videos. From Gallery, tap the Stories tab, and then tap More options (the three vertical dots). Enter your desired name for the story, and then tap Create. Select the desired photos or videos for your new story, and then tap Done. If you want to send some new photos to your friends, you can use Nearby Share, Quick Share, or Private Share. These features will let you send your images directly to a compatible phone without opening any additional apps. You can also use the Sharing panel to share your images and videos to your favorite apps, such as Instagram or Facebook. To begin, open Gallery and select the photo you'd like to share. Then, tap the Share icon at the bottom of the screen. Select your desired app and then follow the on-screen instructions to share your image.
