Android TV Launcher is an Android app and cannot be installed directly on Windows PC or Mac. Android Emulator is a software application that allows you to run apps and Android games on a PC by emulating the Android operating system. There are many free Android emulators available on the Internet. However, emulators consume many system resources to emulate an operating system and run app on it. So we recommend checking the minimum and required system requirements of an Android emulator before downloading it and install it on the PC. Below you will find how to install and run Android TV Launcher on PC: first, download and install an Android emulator on your PC Download Android TV Launcher APK on your PC Open Android TV Launcher APK Using the emulator or drag the APK file into L 'Emulator to install the app. If you do not want to download the APK file, you can install Android TV Launcher PC by connecting your Google account with the emulator and downloading the App directly from Play Store. If you follow the previous steps correctly, you need to have the Android TV launcher ready to run on your Windows or Mac PC. Furthermore, you can control the minimum emulator system requirements on the official website before installing it. In this way, you can avoid any technical problem related to the system. In this article, we will discuss Hoe to install Google TV Launcher on any Android TV before the official launch. This can be complicated as apk's sideloading will not work. This is due to the default / Android TV Launcher. Carefully follow the following article while we will use some methods that are not familiar to many of the users. But if you follow the steps as shown below, you will probably not address any kind of problem. Information on Google TV Launcher based on the list of Play Store, Å ç à ~ "Google TV Home is the basis for all activities on your Google TV Entertainment device. Browse thousands of movies, shows and live TV channels from Your subscriptions without having to jump between the apps. Discover new things to watch with the recommendations based on what you look at and what interests you. "Steps to install before installing Google TV Launcher, we'll download and spreading the APK to our Android TV. Download downloads both apks from the aforementioned links. Now, An Explorer file to view all those files on our TV (recommnd Explorer Solid) then copy the APK into the Android TV. You can use any method to do it. You can use any thump units, but we like to do it using the file ã, ~ Aend a a App.ora, we need to disable the security where you can install / deviate the apks other than the playback archive to do so, follow the steps below, click the travel icon from the current Home screen, then scroll to the Low in the preferences device and open it now, navigate to the safety and restrictions and then the unknown sources, finally, to deactivate the cursor to the right located in the front of the solid Explorer. Now, back to the home page and open Solid Explorer. After opening the solid explorer, locate those APKs, install them by clicking on them, one -BY-ON.ora, return to the Home Page and Open Play Store and Search for the launch of the home screen for Android TV and install it. After installing success, try clicking the Home button in the remote control, as soon as you click the Home button, the TV detects a new launcher like LaunkerX that is nothing but Google TV Launcher. Opens and IÅ You have the brand new Google TV running on your Android TV. Set Google TV Launcher as a predefined launcher, but it will work as a third-party launcher, you will need to open the home app each time to enjoy the new Google TV launcher. You will not find any way to set it as the default launcher, the thing we see on an Android device. Then we will analyze the default Android TV startup program to set the new Google TV launcher as the default startup. Open the device preferences of your Android.Then TV go to Build Version under the section by the way. Now, repeatedly press the developer options are not enabled. After enabling, return to the Device Preferences menu and open the development options. Now, enable USB debugging. And network debugging.Finally, back to the About section and touch the status to get the IP address. Now, back to your PC, we connect your Android TV to the PC via ADB. Setting the ADB In our desktop / laptop the process is not complicated but those who have familiar with ADB, will be able to do it very easily. Well, these days most people have not familiar with ADB, so first, let's go to configure ADB in our system (desktop or laptop). DownloadÅ ç à, ~ Å ç à, ~ Å "Platform-toolsÅ ç à, ~ (Adb driver and fastboot). Extracts the ã ç
